

# Know Your Options for HIV Prevention

PrEP (pre-exposure prophylaxis) is changing the HIV conversation for everyone!

PrEP is a medication that can help prevent HIV. When taken as prescribed, it can greatly reduce your risk of getting HIV.

There are more ways to stay safe from HIV than ever before. You can talk to your provider about what's best for you.

## At Henry J. Austin Health Center, we're here to help you with:

Bi-lingual HIV Prevention, Counseling, and Testing Services

Connecting to HIV Care and Treatment

Pre-Exposure Prophylaxis (PrEP)

Getting Checked for Sexually Transmitted Diseases (STIs)

Whether or not you have insurance, you can still get PrEP.

For more information about PrEP, talk to your provider, visit our website at [henryjainstin.org/sti-hiv-services](http://henryjainstin.org/sti-hiv-services).
